Performance Notes:

Eighth-note is equal and shared between Piano 1 and Piano 2 throughout the piece. When PARENTHESIZED meters occur, they serve only as convenience meters respecting the nature of the note grouping. The eighth-note remains constant with no genuine metric modulation taking place.

Piano 2: Music stand should be removed from its sliding tracks and placed on top those tracks so that it may be pushed as far away from the player as possible allowing easy access to strings and bridge for muting. Each pitch of the muted passage (m.59-62) should be labeled near the bridge for easy locating during performance. Muting of the strings should be done (in either hand) with the first pad of the finger immediately behind the bridge

If the bridge is inaccessible by the hand, a thin strip of felt may be placed against the bridge to achieve the muted effect. Felt should extend no further than 1" beyond the bridge.

The accelerando which begins in m.68 may be delayed to as late as m.71 if it proves too difficult to coordinate in performance.

Option: Pianos may be arranged side-by-side with the length of the piano PERPENDICULAR to the proscenium in order to maximize the stereo effect. This may enhance the audience's ability to discern, from one another, each part's metric contribution to the whole.
